

No. 55 f. Brewery, 109 Yuille Street.

This stone brewery building is considered to be one of the earliest surviving buildings in Buninyong and was constructed for Thomas Sheppard. The utilitarian building comprises stone walls and a corrugated iron roof, formerly shingle. King post trusses and flat bracketed timber columns comprise the structure internally. A fence and brick out building complete the setting. An earlier photograph show a rear two storey timber section which has since been demolished. The Brewery is now being rejuvenated for a residence.

No. 57 Pavilior., Buninyong Botanic Gardens.

Land was first reserved for the Buninyong Bowling Club in 1872, and this Gothic Style Pavilion was probably erected shortly after this date. The simple rectangular plan and entry is defined with a gable roof. Although now in a deteriorated condition, this building is an important structure in the Gardens and should be maintained and enhanced.

No. 58 'The Gong'

The Gong was reserved for the Buninyong Gardens in 1861, and was earlier described as springs and tea tree. This important site is fed by ground water springs and became an important water source for miners, and later was used to fill the public baths.
