Statement of Significance

National Estate Register:

Location of the endemic GREVILLEA STEIGLITZIANA as well as unique site determined plant associations. Endemic genus CHORISTEMON restricted to the Brisbane Ranges (but may be outside the Park). Fairly close to Melbourne and Geelong.

(The Commission is in the process of developing and/or upgrading official statements for places listed prior to 1991. The above data was mainly provided by the nominator and has not yet been revised by the Commission.

Description

National Estate Register:

Dissected peneplain of low bush-covered hills west of the Rowsley fault. Of great botanical interest and utilised for picnicking, bushwalking and bird watching. Recommended extensions (Land Conservation Council, Victoria) would increase the park area to 10,000ha and would include two reference areas.

Condition and Integrity:

Good condition with steps being taken to improve picnic sites. Serious PHYTOPHTHORA CINNAMOMI infestations.

History

National Estate Register: Not Available.
