Notes re: proposed fence

16 Stawell Street, Kew

Boya Pawatt Conservation Consultant

3.2.93

---

I met with Mr & Mrs Murray Sayers on site.

They seemed amenable to the suggestion that the fence should be kept to a height within the range of 1.2 - 1.4 m, and that selected dense boundary plantings of 2-3 m in height be used for screening purposes.

A picket fence with simple uncarved pickets and a capping rail is proposed. I have

suggested two things which they are considering further:

(i) the fence might be allowed to be as high as 1.6 m if the pickets are spaced not too closely i.e. the idea is for the fence not to be a total screen, but rather a filter.

(ii) the south side fence could be extended at the height of the adjacent 2 m parking fence to a point just prior to or past the gate on this side to allow a greater degree of privacy at this point.

The owners are considering their position on these  
issues and will get back to Tom Planning  
at some later stage.
