

INDIVIDUAL HERITAGE PLACE – CITATION

HO281

NAME OF PLACE: Rostrevor

OTHER NAMES OF PLACE: Killara, Wright house.

ADDRESS / LOCATION: 86 Stanhope Street, Malvern

PROPERTY INFORMATION: part of 'Winter's Estate' on Crown Portion 34.

LEVEL OF SIGNIFICANCE: Local.

ASSESSED BY: Graeme Butler, Francine Gilfedder.

ASSESSMENT DATE: March 2002

REVISED ASSESSMENT October 2003

STATEMENT OF SIGNIFICANCE

(as visible from the street)

Rostrevor at 86 Stanhope Street, Malvern, is locally significant architecturally and historically:

- for the distinctive parapeted detached 'row house' form, being uncommon within the City's 19th century residential development (Criterion B2)¹;
- synonymous with its stylistic group, 'Boom Style', the house was the product of a speculative builder during the famous Land Boom period of Melbourne's history (Criterion A4).

).

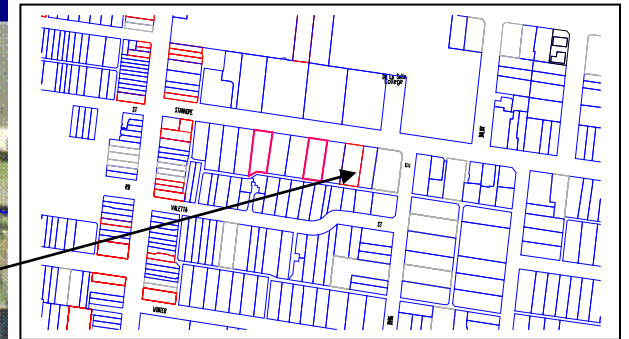

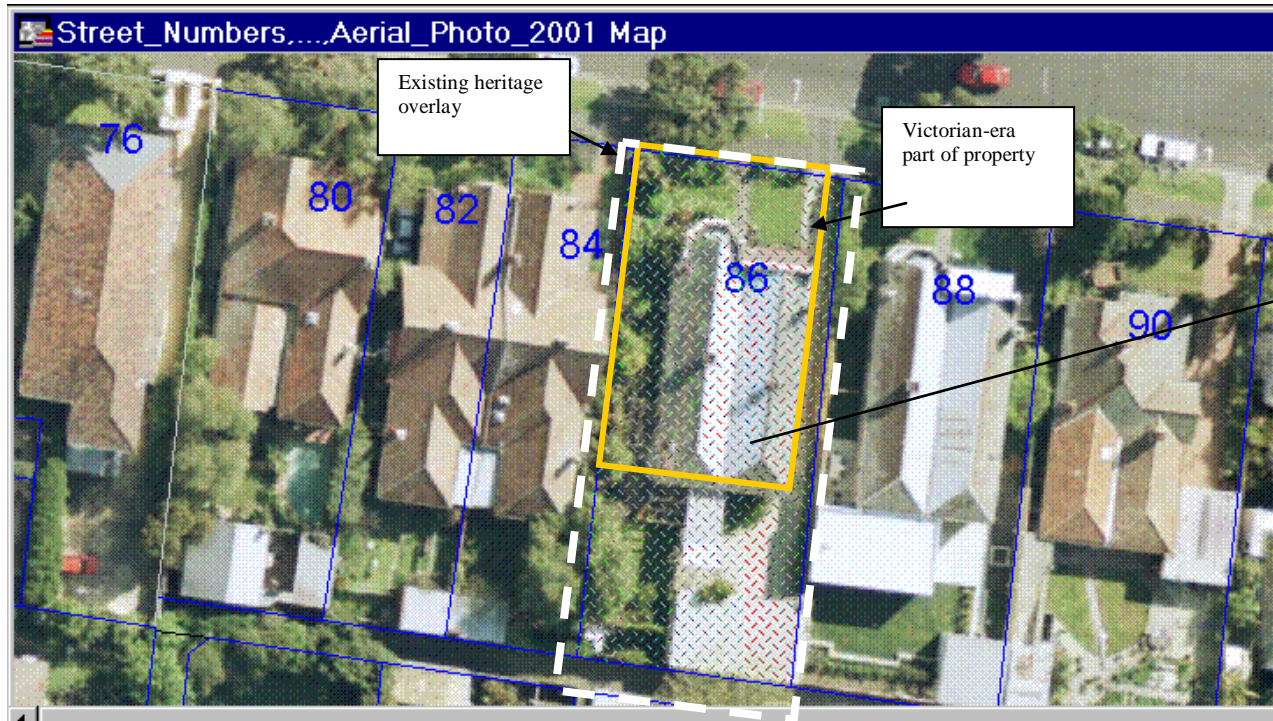

¹ Graeme Butler & Associates maintain that the contribution to a rare row house group is a major element in the significance of this place while also recognising that the group should also be recognised in the planning scheme..

DESCRIPTION:

(as assessed from the street)

Like number 48, this single storey brick and stucco house has a balustraded parapeted façade, with Italian Renaissance detailing consisting of multiple eaves brackets with rosettes between, and masks and consoles terminating the main entablature. Chimney cornices are typical of the era and a tall, crowned terra-cotta pot survives, while behind the parapet are hipped roof forms. Additional detail includes vermiculated panels to the parapet piers and *may* have once included surmounting acroterion and a parapet arch as seen on other examples in the street. Two double-hung windows and two small statuette niches plus the front door (with its side and top lights) are on the north façade, under the front verandah; the projecting bay has three double-hung segment-arched windows. The verandah once had an ogee roof form³ that has since been replaced in a related extended bullnose form. The verandah roof is clad with corrugated iron, and ornamental iron supports with derived Corinthian capitals and a cast-iron frieze; the floor is paved with quarry and encaustic mosaic tiles.

Interior

Not inspected

Condition & integrity

(as assessed from the street)

The bricks have been painted, and new front fence erected (*likely* to have once been timber picket). There may have been once an arched, raised entablature with a shell motif, and the house name *may* have been set in a panel, as in 48, but these are not evident now. The former ogee profile verandah roof has been rebuilt, using an extended bullnose form also used in the late 19th century⁴.

Context

The house is one of many of this design in the street (see 48, 54, 88, 92 Stanhope Street) and is contributory to what is a notable precinct of mainly Victorian-era villas.

⁴ Owner personal communication July 2002

HISTORY

Historical background

From Malvern A Physical History
(Georgina Whitehead in Appendix A, Malvern Urban Character Study)

Successive Subdivisions

The 1880's (in Malvern) were characterised by booming land prices and a rapid expansion in the subdivision and sale of land, particularly for the affluent middle classes { Garden: 214-215}. During this period there was resurgence of the sentimental cult of Home { Davison: 137}. Home was a refuge from the world of commerce and industry and provided rest and revitalization. While only the very wealthy could possess both a town house and a country house, the suburbs were seen as combining the advantages of country and city life. A house and garden in the suburbs became a goal for many people. The suburban garden soothed the overwrought businessman, but fast efficient transport was needed to speed him back to the city to earn the living which supported his return to nature. The inhabitants of the village of Malvern had the choice of either walking, riding or travelling the five miles to Melbourne by horse drawn vehicle, all of which were slow.

In 1879 a much faster option was provided when a railway line was opened to connect Oakleigh Station, where the Gippsland train terminated, with South Yarra Station, through which the Melbourne to Brighton line passed. Caulfield, Malvern and Armadale Stations were built along the new train route and land in their vicinity was sought after. By the close of the 1880's the village for Malvern had disappeared and the suburb of Malvern had taken its place.

Most of the new development occurred to the west of Burke Road. The wealthy built large houses set in extensive grounds on the highest land. The mansions of Whernside, Flete, Moorakyne and Stonington were situated in the north west of Malvern, an extension of Toorak which had always been a prestigious address. Stonington, built on land that had previously been a market garden, was later used as the official residence of the Victorian Governor between 1901 and 1927 while Government House was occupied by the Governor General of Australia { Cooper: 186}.

... Malvern had little to offer in the way of employment and the relatively high cost of train travel to the industrial suburbs prevented Malvern from developing large areas of working class accommodation. The majority of dwellings were staunchly middle class with a frontage to the street of at least 50 feet.

Malvern had confidence in the future; plans were drawn up for an imposing Town Hall to be built on the reserve at the corner of Glenferrie Road and High Street. Alfred Deakin, then Minister for Public Works, laid the foundation stone in 1885. As well as municipal offices the complex incorporated a court house, post office and library { Cooper: 149-151}. The prominence of the site near the crest of the hill added to the town hall's consequence and, from the vantage of the tower, fine views were had over much of the municipality...

However, the impact of the economic, technological and cultural forces that had transformed Malvern from a village to a suburb in less than a decade, ceased with the end of the boom in 1888. Economic depression followed during the 1890s and land awaiting subdivision and sale reverted to agricultural use { Garden: 215}.

...The Glen Iris railway along Gardiner's Creek Valley was opened in 1890, after the collapse of the boom. There were so few people living adjacent to the more easterly stations that the section of line between Darling and Oakleigh Stations was closed in 1895 { Priestley: 152}. The Outer Circle railway between Hughesdale and Fairfield so lacked patronage that the entire line was closed in 1891 after operating for less than two years { Priestley: 152}.

Specific History

(see Foster 1999)

1854

Crown Portion 34, which included more than 7 acres with a frontage to present day Glenferrie Road, was purchased in April 1854 by the Fulton Land Syndicate comprising Thomas Fulton, Lachlan Mackinnon and Frederick Sargood.

Fulton syndicate subdivide Portions 33-36. Portion 34 into three allotments and the allotment at the corner of Glenferrie Road and Stanhope Street was purchased by Robert Punshon,

1861

Punshon sold the land to solicitor, Edward Charsley.

1875

Charsley sold the land, along with several adjacent allotments, to squatter William Winter Irving.

1881

Subdivision of Winter's Estate created Winter Street (between Glenferrie Road and Oxford Street), Irving Street and Oxford Street (formerly known as William Street). Land on the south side of Stanhope Street, between Glenferrie Road and Irving Street, was divided into seven large allotments. A later subdivision reduced many of these allotments to frontages of 66 feet.

1889

Builder John Wright owned a number of allotments in Stanhope Street, including lots 5 and 6 on the south side in the Stanhope Park Estate. Wright built brick houses on both these allotments. On lot 6 Wright built a brick house with 8 rooms (86 Stanhope Street). Wright immediately occupied the house before moving to the new house he built at the corner of Grace and Stanhope Streets (92).

1890-

Accountant Edwin Fowler occupied Wright's house

1894-

The house was occupied by importer Charles Hicks,

1896

John Wright returned to live in the house. It appears that John Wright ran into financial troubles during the economic depression of the 1890s.

1897-1914

Ownership of 86, 88 and 92 Stanhope Street had been transferred to the London Bank. In that year 86 Stanhope Street remained vacant. The London Bank retained ownership of 86 Stanhope Street until 1914. During this period, the house, then numbered 44 Stanhope Street was named Killara and leased to various occupiers including Jones (1900), White (1903), Thomas Symons (1906) and Nye (1908).

1909

Plumbing works were carried out at both 86 and 88 Stanhope Street, under the direction of architects Oakden and Ballantyne.

1910

86 Stanhope Street became the manse for the Malvern Methodist Church when its minister, the Rev. James Harcourt occupied it.

Heritage Overlay Review - Amendment C5, C6
Rostrevor 86 Stanhope Street, Malvern heritage assessment

1913-

The Malvern Methodist Church purchased the house from the London Bank. A succession of Methodist ministers occupied the house, including the Rev. A. Percy Bladen (1914); Rev. George Godbehear (1915); Rev. George Judkins (1918); Rev. John Williams (1923); Rev. James Gault (1926); Rev. Charles Fowler (1931); Rev. William Ellis Lancaster (1934); Rev. Bennett (1940); Rev. Gordon Campbell (1942); Rev. Francis Jenkin (1943) and the Rev. Rea (1954).

1957

The Malvern Methodist Church sold the house to Adrian Boehme, a shipping executive.

1975

Council records indicate that a building permit was issued for the addition of a family room to the rear of the property.

ANALYSIS

Thematic context

The Principal Australian Historic Themes (PAHT) have been developed by the Australian Heritage Commission to allow assessment of historical significance within a national historical thematic framework.

PAHT	Subtheme	Category
Building settlements, towns and cities	Making suburbs	House, urban

Comparative analysis

The row-house style of this house, and of others in the street, is unusual in what is largely a City of detached villas, as listed below. The design is more akin to inner suburban 19th century houses (Carlton, Fitzroy, Richmond, North & West Melbourne, Parkville), typically joined but in this case detached.

Robin Boyd illustrated this house's generic design form in the seminal 'Australia's Home' as Boom Style-Major Steps in Stylism (5). He wrote:

'Boom Style. In the late eighties and early nineties, ornamentation lay heavily on the façade. The slate roof was hidden behind a stucco balustraded parapet, brown, red and cream bricks patterning Precinct-dominated, with a cast-iron verandah, brown Venetian blinds, and vivid coloured glass side and top panels to the front door.'

House examples from the 1880s-1890s identified in the City number over 80 but this house differs from most because of its row house form:

The examples vary in size but most would be in the Italianate manner, as the most common style in this period.

Assessment against the criteria adopted by the Australian Heritage Commission

Summary of relevant Australian Heritage Commission criteria

Code	Summary	Assessment as locally significant	Assessment as of contributory significance
A.4	Association with important events or historical themes	Synonymous with its stylistic group, 'Boom Style', the house was the product of a speculative builder during the famous Boom period of Melbourne's history;	- for its association with the Malvern Methodist church and thus the focus of the local congregation through a long period
B.2	Rarity or distinction among a comparable group	distinctive row house form which is uncommon within the City's 19th century residential development although common in this street	contribution to a detached 'row house' precinct which is uncommon within the City's 19th century residential development

RECOMMENDATIONS:

The house and land should remain in the heritage overlay of the Stonnington Planning Scheme. As an alternative this part of Stanhope Street should be considered as an area heritage overlay with a local policy which demarcated contributory places within that overlay, this house being one.

Proposed extent of heritage place for the heritage overlay

The house and land with emphasis on external fabric from the 19th century.

Planning Scheme Protection in a heritage overlay: Recommended

Other heritage registers

Heritage Victoria Register: No
Register of the National Estate: No

Council has considered a series of amendments to the Schedule to the Heritage Overlay of the Stonnington Planning Scheme. During the exhibition period of former Amendments L47 and L61 objections to the inclusion of some properties in the Schedule to the Heritage Overlay were received. Therefore Council resolved to undertake further analysis of the heritage citations of affected properties prior to holding an independent panel hearing. The amendments are now known as C5 and C6(2) respectively.

The following citation was exhibited with amendment L47.

1889 John Wright - builder

92 Stanhope Street

1889 John Wright builder and owner

(Malvern Rate Books)

NOTE: John Wright appears to be the builder for many of these houses. He is listed as owning several of the lots before construction of the houses. The name of the houses appeared in the rate books in 1894.

1902: Shows this sequence of villas in their original configuration. 40' to the inch plan (MM3W Drainage Plan 1743)

These buildings were first listed in street directories in 1889 and are an excellent example of the richly -decorated suburban villa of the period. They have been used by many people, including Robin Boyd in 'Australia's Home' [1], see below, to illustrate an extreme of the Boom style of the late 1880s. They all feature a projecting bay (typically angled) as well as a balustraded parapet to the roof facing the street with a semi-circular pediment and a scalloped shield motif above the house name. They also all had a double curved iron hipped verandah roof, returning around the corner in the case of Wright's own, more imposing residence. Singly, and without the projecting bay they would be typical of a number of single storey terrace houses in places such as North Carlton. However, the projecting bay with the same balustrade creates a far more elaborate composition. They also feature decorative polychrome brick work (except for 92) beneath the balustraded parapet and elaborate cornice and as well as a hipped cast iron verandah. Whilst these buildings are not all identical, they all share a number of common features. They vary in their integrity and the best examples are No 44, No 50, No 56, No 86, No 88 and No 92. Their external integrity has remained unchanged since 1992, and restoration work or removal of intrusive elements has improved the appearance of several of the group since 1992.

It has been suggested by Miles Lewis that these villas have some similarity to the work of Norman Hitchcock and/or Olaff Nicholson although no tender references have been found to establish a designer. [2]

The villas at 44, 46, 48, 50, 52, 54, 56, 86, 88 and 92 Stanhope Street are of regional significance as a unique group that demonstrates the stylistic excesses and flamboyance of

Heritage Overlay Review - Amendment C5, C6
Rostrevor 86 Stanhope Street, Malvern heritage assessment

the late Boom period. Here, a successful design expression for terrace houses, was translated into a suburban villa format.
